Baileya multiradiata
 Desert Marigold

Desert Marigold is a fast growing annual or biennial, forming clumps of soft woolly gray leaves. It has bright, yellow daisy-like flowers that appear spring through fall. Flowers will rot with too much water, as this plant is heat and drought tolerant. Flowers top at 12". Deadheading will prolong bloom; this plant makes great cut flowers. This plant will reseed itself but needs good drainage. It needs full sun but is very cold hardy.
