Ceanothus thyrsiflorus 'Skylark'

Blue Mountain Lilac

This ceanothus shrub variety has dark blue flower clusters that bloom profusely in the spring. This smaller growing selection grows to 3' tall and wide. This plant tolerates coastal conditions but will also grow in inland, hot valleys as it does well in clay soil. This cultivar seems to bloom longer than other varieties. It does well in full sun but will tolerate dry shade also. Leaves are bright green and glossy.
