Romneya coulteri
 Matilija Poppy

This wonderful California native perennial can reach 5' tall and 8' wide. Foliage is gray green and 3-5 lobes. Large white flowers with yellow centers appear in spring and summer. Slightly scented, attracting bees and butterflies. This plant does best in full or part sun with well draining soil. However, it does spread by underground runners so consider planting on slopes or in areas where it is allowed to spread. Flowers are great for vase arrangements.
