***Asclepias fascicularis***  
 Narrow-Leaf Milkweed

A critical plant in the life-cycle of the Monarch butterfly whose larvae feed on the foliage. Dormant in winter. Produces light green narrow leaves on stalks to 3'. Clusters of pinkish white flowers in the summer. Used effectively in natural gardens and butterfly gardens. Virtually carefree. Low water use. This perennial does best in full sun with well draining, moist or dry soil. It does tolerate clay soil and even flooding!
